About Me

A Motivated Computer Science Engineering student with a steady base in programming, web development, and problem-solving. I enjoy learning new tools and building simple, useful solutions that make a real impact.

Education

Francis xavier engineering college , BE in Computer Science	2023 – 2027
• GPA: 8.4/10.0	
HSC: Muhyiddeen Matric Hr Sec school	2021 – 2023
SSLC: Annammal Matric Sec school	

Technical Skills

Programming Languages: Java, C, python

Web Technologies: HTML, CSS ,Javascript,react.js

Tools: VS Code, MySQL ,Github.

Concepts: Data Structures, OOP, DBMS (basics)

Projects

AI- Powered SQL database chatbot – Python , Streamlit and MYSQL

An AI-powered SQL database chatbot with voice input and output, allowing users to interact with databases using natural language. Features include AI-generated SQL queries, and seamless voice communication for an enhanced user experience

E Commerce website – HTML, CSS, React.js

E-Commerce website developed using HTML, CSS, and react.js featuring responsive design, interactive UI, and basic shopping functionalities like product listing and cart management.

Portfolio website – HTML, CSS, React.js

Personal portfolio website built with HTML, CSS, and react.js showcasing projects, skills, and contact information with a clean and responsive design

Internships

Full Stack and Data Privacy – Evalbench

Gained hands-on experience in full-stack development and data privacy, working on real world web applications at Evalbench Technologies.

Front End Web Development – Infosmite

Worked on front-end development tasks using HTML, CSS, and JavaScript. Assisted in creating responsive user interacting and improving website UI/UX

Certifications

- NPTEL: Introduction to Industry 4.0 and Industrial Internet of Things – Elite Silver
- ORACLE: Java programming
- CISCO: Networking Essentials, CCNA: Introduction to network
